Aeroméxico October 2026 Traffic Results

Mexico City, Mexico, November 4, 2026 – Grupo Aeroméxico S.A.B. de C.V. (NYSE: AERO & BMV: AERO, "Aeroméxico") reports its October 2026 operational results.

Grupo Aeroméxico's total capacity, measured in available seat miles (ASMs), increased 4.5% year-over-year, while demand, measured in revenue passenger miles (RPMs), increased 5.9%.

Aeroméxico's October load factor was 88.2%, an increase of 1.1 p.p. compared with October 2025. During the month, Aeroméxico transported 2 million and 11 thousand passengers.

> **Andrés Conesa, Chief Executive Officer stated:** *"Our October traffic results reflect the continued strength of our network. Demand increased nearly 6% year over year, outpacing capacity growth and contributing to a higher load factor. International markets remained a key driver of our performance, supported by solid demand trends and disciplined capacity allocation. These results underscore the effectiveness of our strategy to align capacity with demand and position us well ahead of the peak year-end travel season. While elevated jet fuel prices continue to pressure costs, we remain focused on initiatives to mitigate their impact and support long-term profitability."*

The information included within this report has not been audited and does not provide information on the Company's future performance. Aeromexico's future performance depends on many factors and it cannot be inferred that any period's performance or its year-over-year comparison will be an indicator of similar future performance.

Glossary:

- "RPMs" Revenue Passenger Miles represent one revenue-passenger transported one mile. This includes itinerary and charter flights. The total RPMs equals the number of revenue-passengers transported multiplied by the total distance flown.
- "ASMs" Available Seat Miles represent the number of available seats multiplied by the distance flown. This metric is an indicator of the airline's capacity. It equals one seat offered for one mile, whether the seat is used.
- "Load Factor" equals the number of passengers transported as a percentage of the number of seats offered. It is a measure of the airline's capacity utilization. This metric considers the total passengers transported and total seats available in itinerary flights only.
- "Passengers" refers to the total number of passengers transported by the airline.
